# ENVELOPES FOR PACKING POULTRY AND MEAT

# APPLICATION EXAMPLE

## Example printing patterns

Different patterns can be printed on the film according to the client's wishes.

### Eco-friendly

After use, the material is recyclable and safe for the environment.

### Proven

The packed product stays fresh longer. The packaging has certificates and is approved for contact with food.

### Does not delaminate

In increased humidity conditions, the material does not stick to the product.

### Grease-resistant

The packaging material is an ideal barrier to grease and water.

### Good shape-memory

It keeps its shape and is resistant to punctures and tears.

### UV protection

It protects products against the adverse influence of UV radiation.

**Save money !**  
protect the environment

Eco-friendly material, containing up to 55% of chalk which reduces the amount of petroleum-based polymers and the detrimental effect on the natural environment.

**UP TO 55% CALCIUM  
MAGNESIUM CARBONATE**

**EASY TO RECYCLE**
